

Linking Systems of Care Coordinator Toolkit

Who Are Our Stakeholders?

Stakeholders are people and groups who can affect the issue or who are impacted by the issue. Stakeholders include those who:

- Will be impacted by a decision or policy, or will receive services
- Have information that's relevant to shape or inform the work
- Will be charged with implementing programs and delivering services
- Will interact with this from other systems or processes

Focus the Linking Systems of Care project. List all the stakeholders you can think of for your project. Make your list specific and detailed.
