## Trauma Responsive Schools in Illinois: Walking the Walk with Trauma-Informed Policies, Procedures and Practices

Linking Systems of Care for Children and Youth  
July 1, 2021

## We know that trauma impacts certain groups of children disproportionately more than other groups

*Resilient Kids. Stronger Communities. Brighter Futures.*

### RECENT DATA HIGHLIGHT INCREASED NEED FOR TRAUMA RESPONSIVE SUPPORTS IN ILLINOIS HEAL COMMUNITIES

#### Low-income and African American children are more likely to have stressful childhoods

Share of kindergartners exposed to frightening or threatening childhood  
experiences, by family income and by race

Number of frightening or threatening experiences:	0	1	2	≥ 3
<b>By family income</b>				
≥ \$20,000	50%	26%	15%	10%
< \$20,000	36%	30%	17%	17%
% more/less likely	-28%	18%	15%	74%
<b>By race</b>				
White	52%	22%	14%	12%
Black	36%	32%	18%	14%
% more/less likely	-31%	45%	29%	21%

Morsy, L. & Rothstein, r. (2019). African American children growing up poor are at greater risk of disrupted physiological functioning and depressed academic achievement.

## Why Trauma Responsive Schools?

- Exposure to trauma has been associated with post-traumatic stress disorder and other related mental health disorders
- Exposure to trauma has consistently been found to impact learning, behavior and relationships at school
- Children spend up to 35 hours a week in school; hence, it is critical for schools to be responsive to students who have experienced trauma (NCSEA, 2019)

© 2021 Ann & Robert H. Lurie Children's Hospital of Chicago. All rights reserved.

## Trauma Responsive Schools/Bullying Prevention Goals

### PREPARE

Prepare educators and schools to assess, develop and/or strengthen trauma-informed policies and practices

### FOSTER

Foster educators' sense of agency through shared learning from peers

### ASSIST

Assist schools in creating school data-driven trauma responsive goals and action steps within action plans

### PLAN

Plan for sustainability by involving the school, network and district level administrators

© 2021 Ann & Robert H. Lurie Children's Hospital of Chicago. All rights reserved.

**Despite growing support and increased rate of which trauma-informed approaches are being promoted and implemented in schools, evidence to support this approach is lacking**

(Maynard, Farina, Dell & Kelly, 2019)

## Needs Assessment Tool

Trauma Responsive School  
Implementation Assessment

### STAFF SELF CARE FOR SECONDARY TRAUMATIC STRESS

1. To what extent does your school/district have a standard approach for building staff awareness of compassion fatigue and STS which include providing tools for self-monitoring and building self-care strategies.

1 2 3 4  
No Approach Standardized approach.

2. To what extent does your school/district facilitate peer support among staff working with students exposed to trauma?

1 2 3 4  
No defined strategies. Teachers provide support when they notice a colleague in distress. Clearly defined strategy for supporting peers.

3. To what extent are there professional resources available for staff on campus?

OVERALL COMPOSITE SCORE: 2.00

## Summary of TRS-IA Scores Across Participating CPS Schools

Trauma Responsive School  
Implementation Assessment

Average scores for 8 CPS schools across 8 TRS-IA domains

© 2021 Ann & Robert H. Lurie Children's Hospital of Chicago. All rights reserved.

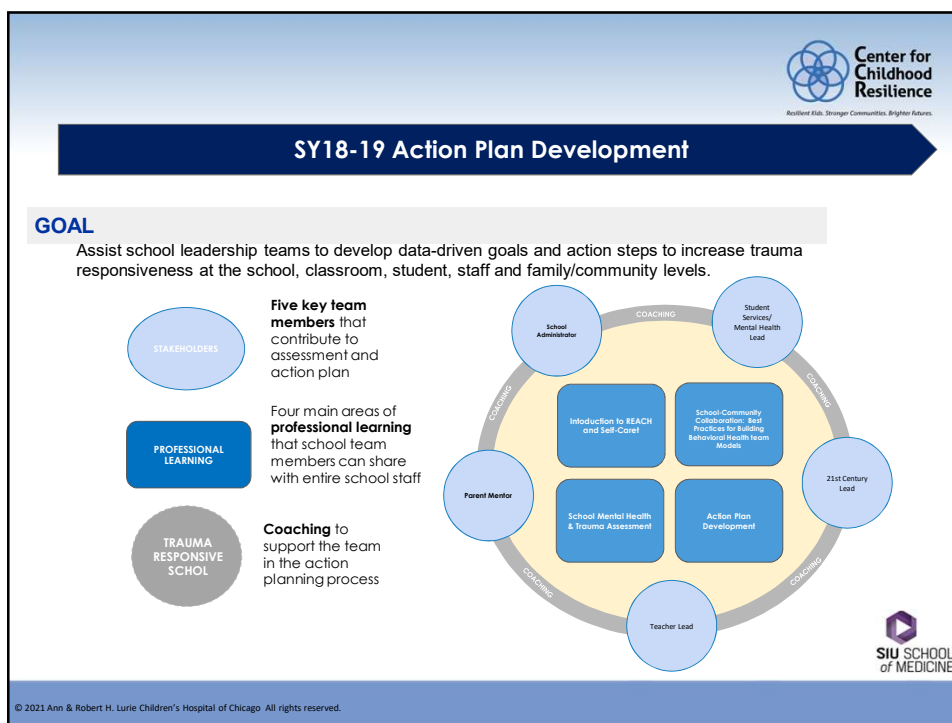

## Discussion Points

- TRS-IA provides useful information for schools and school systems about needs and barriers
- Respondents find TRS-IA appropriate and useful
- It also provides interesting data nationally on strengths and weaknesses
- Since school data is identifiable and locations are known, can link to community data sources to understand patterns nationally

## Program Data Tracking: ICJIA TRS Schools Action Plans

### Main Themes of the ICJIA Trauma Responsive Schools (TRS) Action Plans

Identification of a need and plan for **foundational trauma** training(s) for all school staff (e.g., NSELS, CCR, other partners)

Expressed need and plans for **ongoing training** in strategies that support the various pillars of trauma responsiveness

Highly elevated need for education for teachers on **secondary traumatic stress** and self-care

Need for **de-stigmatization** around mental health promotion and treatment for school staff (e.g., newsletters and Employee Assistance Program)

Need to move beyond collection and monitoring of implementation data to measurement of **impact data** (e.g., self-care instruments)

Requests for training in **evidence-based trauma-focused interventions** for students in need

Exploration of **whole classroom** emotion regulation strategies

Definite need for **financial resources** to support the implementation of action plan

Questions/concerns regarding **ongoing coaching/progress monitoring** of action plan

## Building Trauma Responsive Schools: Questions for Consideration

What groups, meetings, or partnerships are already embedded that could take leadership in developing a trauma responsive schools? If there are none, would there be a group available and willing to take charge?

What tools do you currently use to assess trauma responsiveness as a system and progress in implementation? How are these tools currently serving your needs?

Would the TRS-IA serve your school and district goals support the evaluative and action planning process? Why or why not?

What additional information do you need to decide how you want to begin building a trauma responsive school?

© 2021 Ann & Robert H. Lurie Children's Hospital of Chicago. All rights reserved.

## Building Trauma Responsive Schools: Your First Step

- What is your first step and action you will take from today to begin TRS work?
  - Who will implement this step?
  - How will you evaluate that it was completed or successful?

The Trauma Responsive Schools Implementation Assessment (TRS-IA) was developed by the Treatment and Services Adaptation Center for Resilience, Hope, and Wellness in Schools in collaboration with the Center for School Mental Health. The assessment was created using the RAND/UCLA Modified Delphi Approach—a commonly used evidence-based strategy for developing quality measures. Employing this approach, developers engaged a panel of national experts in a consensus process to identify and refine best-practice guidelines for trauma-responsive school implementation. Furthermore, guided by a community-participatory framework, on the ground school administrators and teachers from various regions of the country were consulted to ensure the assessment was culturally-sensitive and could be easily used by busy school personnel. The TRS-IA is an evidence-informed self-assessment that can quickly and efficiently to identify trauma responsive programming and policy domains of strengths, as well as areas with greater room for improvement.

This assessment measures eight key domains of a Trauma-Responsive School:

- |   |  |
|---|--|
| (1) Whole School Safety Programming     | (5) Prevention/Early Intervention Trauma Programming |
| (2) Whole School Prevention Programming | (6) Targeted Trauma Programming                      |
| (3) Whole School Trauma Programming     | (7) Staff Self-Care                                  |
| (4) Classroom-based Strategies          | (8) Community Context                                |

Each domain contains multiple questions which are rated on a scale from 1 (least trauma-responsive) to 4 (most trauma responsive).

This measure can be completed by an administrator and/or other designated school staff in one sitting. Please record the name(s) and role(s) of the person(s) completing this questionnaire.

If you are completing this assessment for a district, please answer the questions for the schools in your district.

### WHOLE SCHOOL SAFETY PLANNING

**1. How comprehensive is your school's/district's assessment of campus physical safety (e.g., conducted at an appropriate frequency, uses a structured checklist)?**

1	2	3	4
Minimally comprehensive, only addresses immediate dangers			Very comprehensive

**2. To what extent are students routinely supervised in a developmentally-appropriate way across campus (including lunch rooms, hallways, playgrounds) recognizing that strategies vary by elementary, middle, and high school?**

1	2	3	4
Staff inconsistently watches students			Routine monitoring across entire campus

**3. To what extent does your school/district have a clearly defined strategy to determine when a student may present harm to another student or staff?**

1	2	3	4
No defined process			Clearly defined process

**4. To what extent have school staff been trained in bullying prevention strategies?**

1	2	3	4
School staff are encouraged to prevent bullying on campus, but no training has been offered.			There is a school-wide approach with appropriate training for educators in bullying prevention strategies.

**Whole School Safety Programming Total Score: \_\_\_\_\_/4 = Mean Score: \_\_\_\_\_**

## WHOLE SCHOOL PREVENTION PLANNING

**1. To what extent does your school/district have a clearly defined process for students to report concerns about peers (e.g., that a peer who may harm themselves or others) to staff?**

1	2	3	4
No defined process exists for students to report concerns about peers.			Both students and staff know the process for students to report concerns about peers.

**2. To what extent does your school/district have a clearly defined process for sharing academic, legal, and mental health records among relevant parties (teachers, counselors, law enforcement)?**

1	2	3	4
No defined process exists.			A clearly defined process exists.

**3. To what extent do you survey a range of stakeholders (e.g. parents, staff, school resource officers, security officials, and students) about their perceptions of your school's/district's climate?**

1	2	3	4
No assessment of climate.			Assessment of all stakeholders

**4. How routinely do you conduct an assessment of your school's/district's climate?**

1	2	3	4
Never			At least some stakeholder groups assessed on a routine basis (at least once per year)

**5. To what extent has your staff been educated/trained so that any emergency drills that are conducted are done so in a manner sensitive to students with trauma histories? (alarms that may elicit reaction)**

1	2	3	4
Teachers and staff are encouraged to be sensitive to trauma exposure during emergency drills.			Teachers and schools staff have received training in a specific strategy for being sensitive to trauma exposure during emergency drills.

**6. To what extent does your school/district have clearly defined and articulated behavioral expectations for students?**

1	2	3	4
There are no defined school-wide behavioral expectations. Teachers have independent behavioral expectations.			School-wide behavioral expectations have been defined and communicated to students in a consistent and ongoing manner.

**7. To what extent has your school staff been trained in a strategy for reinforcing behavioral expectations?**

1	2	3	4
Teachers are encouraged to reinforce behavioral expectations but no defined strategy exists.			School staff are trained in and utilize a clearly defined approach to reinforce behavioral expectations

**Whole School Safety Programming Total Score: \_\_\_\_\_/7 = Mean Score: \_\_\_\_\_**

## WHOLE SCHOOL TRAUMA PROGRAMMING

**1. To what extent have teachers and/or other school staff been trained to provide emotional support to students following a traumatic event (i.e Psychological First Aid, PFA-S, NASP PREPaRE)**

1	2	3	4
Teachers and other school staff are encouraged to support students but no organized training has been provided.			Teachers and other school staff have been trained in a specific approach and utilize it when necessary.

**2. To what extent does your school/district have clearly defined discipline policies that are sensitive to students exposed to trauma?**

1	2	3	4
Some teachers may take trauma exposure into account when taking disciplinary action.			Clearly defined disciplinary procedures that are trauma sensitive.

**3. To what extent have school security personnel (school resource officers, school police, security force) been trained to identify symptoms of trauma and respond using tactics to avoid re-traumatization?**

1	2	3	4
Security staff are encouraged to identify and interact with students using methods that are trauma-informed and avoid re-traumatization.			Security personnel have been trained in a specific approach to identify and interact with students using methods that are trauma-informed and avoid re-traumatization.

**4. To what extent has your school/district established and follow a restorative approach to resolving conflicts that arise on campus.**

1	2	3	4
Teachers and other school staff are encouraged to help students resolve conflicts but no single defined strategy exists.			Clearly defined approach.

**5. To what extent does your school/district educate staff about trauma and its effect on students (impact on brain, behavior and academics)?**

1	2	3	4
Minimal. Addressed through a brief one-hour in-service			Substantial Attention (ongoing educational opportunities).

**6. To what extent does your school/district train staff in skills for interacting with and supporting traumatized students? (ex. de-escalation, referral)**

1	2	3	4
Minimal-Addressed through a brief one-hour in-service.			Substantial Attention (ongoing educational opportunities).

**Whole School Safety Programming Total Score: \_\_\_\_\_/6 = Mean Score: \_\_\_\_\_**

## CLASSROOM-BASED STRATEGIES

**1. To what extent have teachers been trained in the incorporation of Social Emotional Learning (SEL) principles into their work with students?**

1

Teachers are encouraged to incorporate concepts into their work but have not been trained in a specific approach.

2

3

4

Teachers and other school staff have been trained in a specific approach and utilize it when necessary.

**2. To what extent has school staff been trained to identify potential triggers for students and ways to de-escalate when a student may become deregulated?**

1

Teachers are encouraged to create safe and calm classrooms but have not received training for doing so.

2

3

4

Teachers have received a thorough training in strategies for keeping classrooms safe and calm.

**3. To what extent does your school/district have a clearly defined approach for providing behavioral support to students in the classroom?**

1

Teachers are encouraged to find ways to support children in the classroom.

2

3

4

Clearly defined approach.

**4. To what extent does your school/district have a clearly defined approach to integrate a student's trauma history into the IEP process?**

1

Occasionally addressed in IEP process.

2

3

4

Clearly defined strategy for including trauma history into the IEP process.

**Whole School Safety Programming Total Score: \_\_\_\_\_/4 = Mean Score: \_\_\_\_\_**

### EARLY INTERVENTION TRAUMA PROGRAMMING

1. How routinely does your school/district incorporate trauma exposure into your mental health assessments?

1  
Does not do so at all

2

3

4  
Does so routinely for all students receiving mental health assessments.

2. Does your school/district implement a specific intervention to meet the needs of kids suffering from trauma (i.e. CBITS, SSET, Bounce Back)?

1  
No specific intervention is implemented.

2

3

4  
Routinely implements a specific Evidence-based Practice (EBP) for students who have experienced trauma.

Whole School Safety Programming Total Score: \_\_\_\_\_/2 = Mean Score: \_\_\_\_\_

### TARGETED TRAUMA PROGRAMMING

1. When multidisciplinary teams meet to address a student's performance, to what extent is there a clearly defined approach for examining trauma exposure as a contributor to student performance?

1  
No defined process

2

3

4  
Trauma exposure is routinely integrated into these discussions.

2. To what extent does your school/district have working relationships with external community mental health agencies to refer students who have been exposed to trauma?

1  
No established relationships.  
Community providers are found as needed

2

3

4  
Strong community partnership exists.

Whole School Safety Programming Total Score: \_\_\_\_\_/2 = Mean Score: \_\_\_\_\_

## STAFF SELF CARE FOR SECONDARY TRAUMATIC STRESS

**1. To what extent does your school/district have a standard approach for building staff awareness of compassion fatigue and STS which include providing tools for self-monitoring and building self-care strategies.**

1	2	3	4
No Approach			Standardized approach.

**2. To what extent does your school/district facilitate peer support among staff working with students exposed to trauma?**

1	2	3	4
No defined strategies. Teachers provide support when they notice a colleague in distress.			Clearly defined strategy for supporting peers.

**3. To what extent are there professional resources available for staff on campus?**

1	2	3	4
No resources.			Resources specific to secondary traumatic stress

**Whole School Safety Programming Total Score: \_\_\_\_\_/3 = Mean Score: \_\_\_\_\_**

## COMMUNITY CONTEXT

**1. School staff have been trained to be responsive and considerate of cultural issues (i.e. language barrier, undocumented status)**

1	2	3	4
No training			Teachers and other school staff have been trained in a specific approach and utilize it when necessary.

**2. To what extent are racially and ethnically sensitive resources and services made available to the families of students receiving tier 2 and 3 interventions.**

1	2	3	4
No supports available.			Routine incorporation of supports

**3. To what extent does your school/district identify opportunities to engage families and the broader community about trauma and its impact.**

1	2	3	4
No engagement			Ongoing engagement (several meetings each school year)

**4. To what extent does your school/district have partnerships with community-trusted organizations (i.e churches, health centers) to further support the families in need.**

1	2	3	4
No partnerships identified			Contracted partnerships with several organizations

**Whole School Safety Programming Total Score: \_\_\_\_\_/4 = Mean Score: \_\_\_\_\_**

### **Mean Scores by Domain**

The team can enter the mean score by domain in the table below and then check the box in the far-right column if that domain is determined to be a priority area.

<b>Domain</b>	<b>Mean Score</b>	<b>Priority Area?</b>
Safety Planning		
Prevention Planning		
Trauma Programming		
Classroom Strategies		
Prevention/Early Intervention		
Targeted Trauma-Informed Programming		
Staff Self-Care		
Community Context
